Dr. A. I. Thomas, President
Prairie View A. and M. College
Prairie View, Texas 77445

Dear Dr. Thomas:

Pursuant to our recent conference, I am submitting a synopsis of my academic experiences at Syracuse University and the areas of competency acquired from those experiences.

SUBJECT AREAS

Administration of Instructional Technology ----- 6 Semester Hours Credit

Organizational patterns and administrative procedures for instructional technology. Emphasis were placed on organization, management and control of personnel, facilities, and finances.

Instructional Systems Design----- 3 Semester Hours Credit

A basic study of techniques for designing and analyzing instructional systems with emphasis placed on the specification of instructional objectives, the design and selection of instructional alternatives, and on the evaluation of instructional systems.

Foundations of Instructional Technology----- 3 Semester Hours Credit

An introductory to the field of instructional technology. Emphasis were placed on definition and development of the field, impact of technology on educational institutions, characteristics of media, objective specification, evaluation of instructional modules and instructional systems.

Curriculum Planning and Development----- 12 Semester Hours Credit

A study of the process of curriculum development. Emphasis were on the seven steps concept of curriculum building: Rationale Building, Needs and Priority Assessment, Goal Selection, Content Selection, Methodological Selection, Format Development and Tryout, Evaluation/Revision. An extensive study was made of the Domain of Instructional Technology.

Research in Educational Technology----- 6 Semester Hours Credit

An analysis and synthesis of current literature in the field of Educational Technology in terms of design, measurement problems, and statistical treatment.

An examination of the relationship among learning theories, communication theories, motivation, perception, and instructional media research.

Message Design for Instructional Systems----- 3 Semester Hours Credit

An analysis of specifications for facilities, equipment and materials for learning under a variety of learning settings. An evaluation of instructional media in relation to content and learner characteristics.

Still Photography-in Education----- 3 Semester Hours Credit

A study of the philosophy, scope, educational planning, and techniques of preparation of photographic audiovisual materials.

Instructional Graphics----- 3 Semester Hours Credit

An introductory to the design and preparation of instructional materials.

Problems of Modern Librarianship----- 3 Semester Hours Credit

A study of contemporary library problems with emphasis on instructional materials center. Implications of the application of these concepts for the theory and practice of librarianship in the future.

Dissertation-----18 Semester Hours Credit

RESEARCH TOPIC: A Study Of Library Services In The Public Schools Of Texas

The research was designed to investigate: 1) Is there a merger of audiovisual and library services into a unified media program in the public schools of Texas; 2) Is there a need for unique kinds of professional training for the personnel who will manage the newly unified media programs at the school building level?

COMPETENCY AREAS

Departmental: Chairman or Professor in an academic program in Instructional Technology (Audiovisual Education) or Library Science preparing Learning Resource Specialist (Librarians) for public schools.

Administrative: Director, centralized Instructional Media Center with emphases in; research selection, acquisition, preparation, production, utilization and dissemination of media.

Curriculum Coordinator, curriculum planning and development of instructional technology.

Yours truly,
Marion Henry
