County San Jacinto  
District Eastern

### Analysis of County Situation

San Jacinto County is located in East Central Texas, A large part of it being in the famous Trinity and San Jacinto river valley, The larger <sup>part</sup> of it has been held in large bodies by lumber companies and has not been on the market at any price nor open up for development until now,

The county is in the Texas Costal Oil District, and oil prospecting, leasing and drilling has commenced here and prospects of developing looks good, we are well served by Highways and graded roads,

Coldspring the county seat is located on highway No. 45, about 60 miles from Houston, Texas and about 75 miles inland from the Louisiana State line. The land is well drained by creeks flowing into the Trinity and San Jacinto rivers, which have high banks and rapid currents.

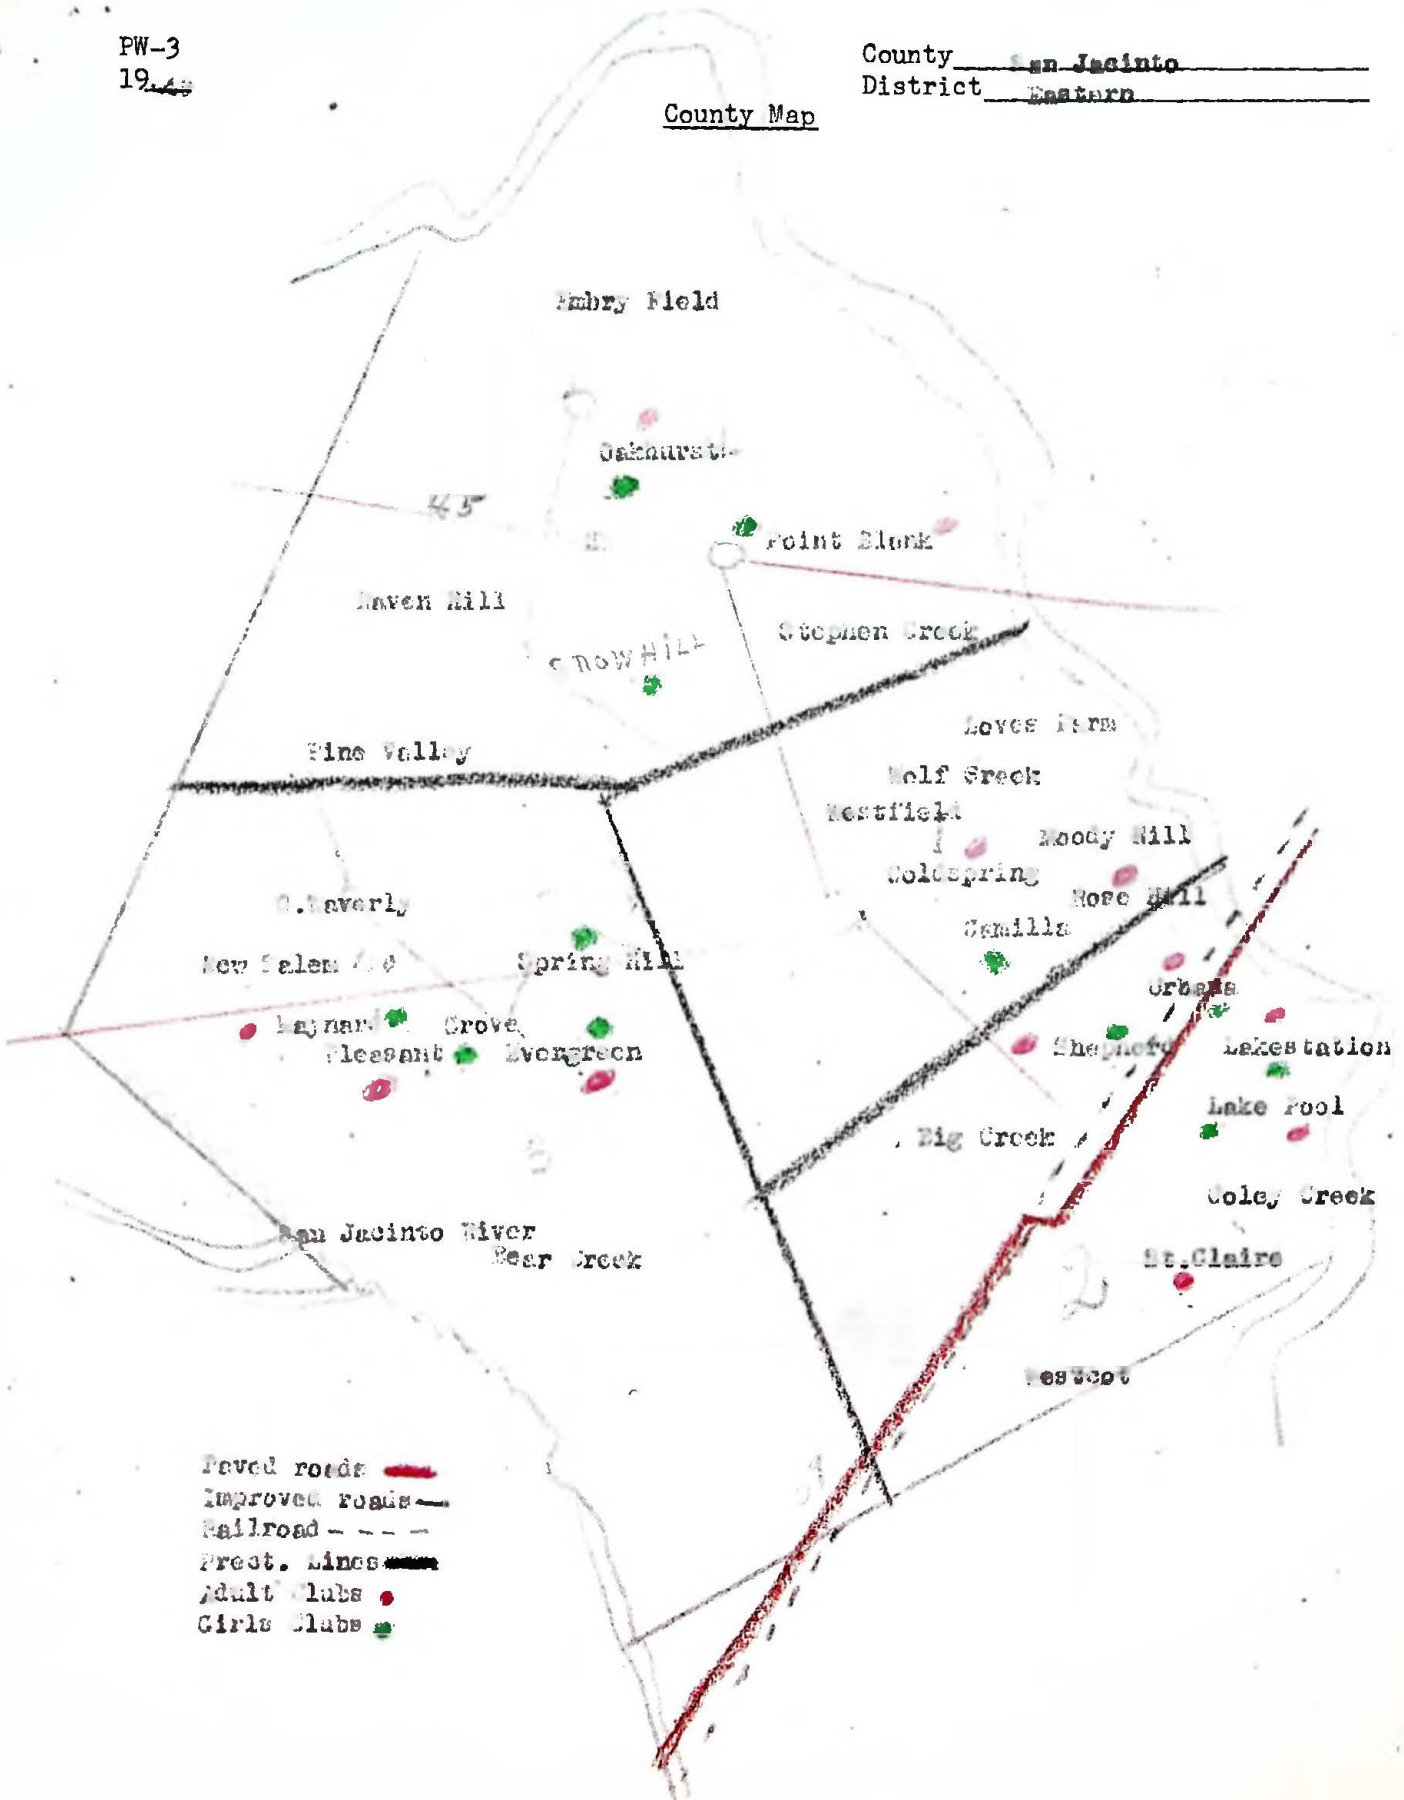

Population 919 of this number 519 are negroes who farm cheaply for a living, we have different types of soil, at the Trinity and San Jacinto river running back from five to six we have black soil, a very little land in the county need fertilizing, with our ten months of growing season, plenty of rain and sunlight, A complete crop failure in practically unknown.

The principal crops are cotton, corn, oats, sweet potatoes, irish potatoes, ribbon cane, peas, peanuts, watermelons, cantalopes, and many other crops, Vegetables such as tomatoes, english peas, beans, raddishes, cabbage, onions, lettuce, carrots, turnips, okra, collards, mustard, squash, cucumbers, spinach, kale, swischard and pepper, we do not know of any vegetable that will not grow here and do well.
